SUMMARY

Design engineer with 13 years of experience spanning UX design and full-stack development. Started as a lead UX designer, transitioned into engineering, and spent the last five years as the sole engineer responsible for designing, architecting, building, and shipping a production LMS from the ground up. I work across product discovery, UX design, frontend engineering, backend development, and system architecture, designing directly in production code rather than treating design and implementation as separate phases. I use React and TypeScript as my primary design medium, refining interaction, usability, and visual detail in the environment where users actually experience the product.

EXPERIENCE

**2021–
July 2026**

Design Engineer

MathTrack Institute (previously XR Technologies)–Indianapolis, IN

As the sole engineer, architected, designed, and shipped a production LMS encompassing a CMS, SIS, EMS, evaluation platform, and more, serving 400+ users and 160+ content courses with over 250K activity records annually.

Responsible for system architecture, backend APIs, database design, cloud infrastructure, hosting, networking, deployment, and all UI/UX from product discovery through production deployment.

Designed directly in React and TypeScript, using code to iterate on interaction, usability, and visual detail. Built and evolved a reusable component system on top of Material UI to support consistent, high-quality interfaces.

**2020–
2021**

Web Developer & Data Manager

XR Technologies–Indianapolis, IN

Designed and developed internal tools to streamline student data collection and reporting. Defined data requirements, evaluated existing workflows for inefficiencies, and built user-facing applications that improved data quality and usability.

EXPERIENCE *(continued)*

2017–
2020

Lead UI/UX Designer

Crossroads Education–Indianapolis, IN

Lead UX designer for a digital whiteboard tutoring web application and a student data visualization tool. Conducted user research, designed wireframes and high-fidelity mockups, ran usability studies, and collaborated closely with developers throughout implementation.

2013–
2017

UI/UX Designer & Graphic Designer

Math Assistance Center IUPUI–Indianapolis, IN

Led UX design across several grant-funded web applications, including a synchronous whiteboard tool and student data visualizations. Conducted user research, designed wireframes and high-fidelity mockups, ran usability studies, and collaborated closely with developers throughout implementation. Created branding, marketing materials, and other visual assets.

EDUCATION

2021

Web Development Boot Camp

Eleven-Fifty Academy–Indianapolis, IN

2017

B.F.A., Visual Communication Design

Indiana University–Indianapolis, IN
