SUMMARY

Design Engineer with 13 years of experience spanning UX design and full-stack engineering.

I combine user-centered design with technical execution to turn ambiguous ideas into intuitive software while balancing user needs, technical constraints, and business goals. I thrive in fast-paced environments with evolving priorities and am equally comfortable leading initiatives independently or collaborating with diverse teams.

EXPERIENCE

2021–

July 2026

Design Engineer

MathTrack Institute (previously XR Technologies)–Indianapolis, IN

- Architected, designed, and evolved a production SaaS platform supporting student information, learning management, teacher apprenticeship, and other education programs.
- Partnered directly with leadership and subject matter experts to define product direction and lead UX across the platform through product discovery, user research, interaction design, and interface design, implementing solutions directly in production code.
- Engineered the platform end-to-end using React, TypeScript, Node.js, Express, PostgreSQL, and Heroku, including frontend development, system architecture, backend services, cloud infrastructure, deployment, and ongoing maintenance.
- Automated internal workflows and developed integrations that reduced administrative effort and improved operational efficiency.

2017–

2021

Lead User Experience Designer

XR Technologies–Indianapolis, IN

- Led UX for a digital whiteboard application and student data visualization platform.
- Partnered with stakeholders and users to define product direction through design research, design thinking workshops, and usability testing.
- Mentored a junior designer and established UX standards through design reviews and feedback.
- Designed interaction flows and high-fidelity interfaces in collaboration with developers.
